RANGER SUPER DUTY

AVAILABLE FROM MARCH 2026

The Ford Ranger Super Duty is a new version of the Ranger designed for heavy-duty use, offering much higher towing and payload capacities. It's designed for customers who need a mid-size truck with substantial capability, such as emergency service operators, utilities and the military.

Super Duty is a badge only awarded by Ford to their toughest vehicles. It's been developed by professionals, for professionals, from deep engagement with heavy duty sectors.

Modifiable for use with

JP8 / F-34 JET FUEL

Ford have strengthened the drivetrain and armoured the underbody, given it a wider stance and a much greater range.

The unique frame has been engineered for increased strength, performance, and load-carrying capacity. This includes a thicker frame, reinforced suspension mounts, and stronger driveshafts. Together, these upgrades give extensive capability in a compact package that typically only larger truck-based vehicles can achieve.

**We've tested it to extremes
for durability and strength.**

For Modifiers, the reinforced frame and readily accessible mounting points make it easy to integrate a variety of modifications, aftermarket accessories and specialized equipment.
